COMBINED CLINICAL RECORD & ITEMIZED STATEMENT — PRIOR AUTHORIZATION REQUEST

Patient	CHEN, MARGARET A.	MRN	4471982
Date of Birth	1961-03-22 (Age 63)	Sex	F
Member ID	XJH-4471982-01	Payer	Meridian Health Plan
Group No.	GRP-88214	Plan Type	PPO
Attending	R. Okonkwo, MD — Orthopedic Surgery	Provider NPI	1801882447
Document Date	2024-11-01	Request Type	Prior Authorization

1. DIAGNOSES

#	ICD-10	Description	Onset	Status
1	M17.11	Unilateral primary osteoarthritis, right knee	2022-04-18	Active
2	E11.9	Type 2 diabetes mellitus without complications	2019-08-02	Active
3	I48.91	Unspecified atrial fibrillation	2021-01-15	Active
4	E66.9	Obesity, unspecified	2020-06-11	Active

Primary diagnosis for this request: **M17.11**. Radiographic confirmation on file (see Section 4).

2. HISTORY & PHYSICAL — ORTHOPEDIC CONSULTATION (2024-09-18)

63-year-old female presents with a 30-month history of progressive right knee pain, first documented 2022-04-18. Pain is described as constant, worse with weight-bearing, and no longer controlled by oral analgesics. She has completed a supervised course of physical therapy and has received two intra-articular corticosteroid injections without durable relief. She denies recent knee trauma and denies any history of septic arthritis. Mother had bilateral knee replacements in her seventies.

Examination. Antalgic gait. Right knee range of motion 5–95 degrees with a 5-degree flexion contracture. Crepitus with passive movement. Medial joint line tenderness. Varus deformity approximately 8 degrees. Neurovascularly intact distally.

Functional status. Patient reports difficulty ascending stairs and is unable to ambulate greater than 100 metres without rest. She requires a cane for community distances and reports interference with dressing and bathing. She has discontinued her volunteer work owing to pain.

Assessment and plan. End-stage tricompartmental osteoarthritis of the right knee, refractory to conservative management. Recommend right total knee arthroplasty. Risks, benefits and alternatives discussed; patient elects to proceed. Anticoagulation to be bridged per cardiology.

3. CONSERVATIVE THERAPY LOG — PHYSICAL THERAPY (CPT 97110 / 97140)

Visit	Date	CPT	Units	Therapist	Note
1	2024-06-04	97110	3	L. Márquez, PT	Initial eval; quad strengthening initiated
2	2024-06-11	97110	3	L. Márquez, PT	Tolerated well; ROM 10–90
3	2024-06-25	97140	2	L. Márquez, PT	Manual therapy; effusion noted
4	2024-07-09	97110	3	L. Márquez, PT	Progressed closed-chain exercise
5	2024-07-23	97110	3	D. Farrow, PT	Pain 6/10 post-session
6	2024-08-06	97140	2	D. Farrow, PT	Limited by pain; plateau noted
7	2024-08-20	97110	3	D. Farrow, PT	No functional gain since visit 4
8	2024-09-03	97110	3	L. Márquez, PT	Stair negotiation remains limited
9	2024-09-12	97140	2	L. Márquez, PT	Discharge; conservative care exhausted

Course duration 2024-06-04 to 2024-09-12 (14.6 weeks). Longest interval between visits: 14 days. Two intra-articular corticosteroid injections administered 2024-05-14 and 2024-07-30 (CPT 20610). Discharge summary: no durable functional improvement; conservative management considered exhausted.

4. LABORATORY, VITALS & IMAGING

Test	LOINC	Result	Units	Ref. Range	Date
Body mass index	39156-5	34.2	kg/m2	18.5 – 24.9	2024-09-30
Body weight	29463-7	94.3	kg	—	2024-09-30
Hemoglobin A1c	4548-4	7.1	%	4.0 – 5.6	2024-09-30
eGFR (CKD-EPI)	62238-1	68	mL/min/1.73m2	> 60	2024-09-30
Creatinine, serum	2160-0	0.94	mg/dL	0.60 – 1.10	2024-09-30
INR	6301-6	2.4	ratio	2.0 – 3.0 (on tx)	2024-10-22
Hemoglobin	718-7	12.8	g/dL	12.0 – 15.5	2024-10-22

Radiology — right knee, 3 views (2024-08-20). Severe tricompartmental joint space narrowing, most marked in the medial compartment with bone-on-bone apposition. Subchondral sclerosis and large marginal osteophytes. Findings consistent with advanced degenerative joint disease, Kellgren-Lawrence grade 4. Interpreting radiologist: S. Vellani, MD.

5. ACTIVE MEDICATIONS

Medication	RxCUI	Dose / Route	Frequency	Start	End
Warfarin sodium	11289	5 mg PO	Daily	2021-01-20	active
Celecoxib	140587	200 mg PO	Twice daily	2024-07-02	active
Metformin HCl	6809	1000 mg PO	Twice daily	2019-08-10	active
Acetaminophen	161	650 mg PO	As needed	2022-05-01	active
Tramadol HCl	10689	50 mg PO	As needed	2023-11-14	2024-06-30

Allergies: penicillin (rash). No known food allergies.

6. REQUESTED PROCEDURE

CPT	Description	Laterality	Scheduled	Setting	Est. LOS
27447	Arthroplasty, knee, condyle and plateau; medial AND lateral compartments (total knee arthroplasty)	Right	2024-11-03	Inpatient	2 days
01402	Anesthesia for open procedures on knee joint	Right	2024-11-03	Inpatient	—

7. ITEMIZED STATEMENT

Line	Rev.	CPT / HCPCS	Description	Qty	Charge (USD)
1	0360	27447	Total knee arthroplasty, right — surgeon	1	24,800.00
2	0370	01402	Anesthesia, knee arthroplasty (118 min)	1	3,150.00
3	0278	C1776	Implant — cemented total knee system	1	7,420.00
4	0110	—	Semi-private room, 2 days	2	2,180.00
5	0250	—	Pharmacy, inpatient	1	610.00
6	0420	97110	Physical therapy, post-operative inpatient	2	240.00
			TOTAL BILLED		38,400.00

8. ATTESTATION

I certify that the services described above are medically necessary, that the clinical documentation in this record accurately reflects the care provided, and that conservative treatment alternatives have been attempted and documented.
